### 2. Review and results of operations

#### Operating Review

The consolidated loss of the Group for the half-year ended 31 December 2017 after providing for income tax amounted to \$957,749 (2016: profit of \$131,093).

#### Review of Operations

Since the start of the 2017/2018 financial year the Company has completed the following activities:

- Implemented a focused exploration strategy on AUR's highly prospective tenement holdings in the Bryah Basin, Western Australia.
- Finalised the acquisition of 100% of the Doolgunna tenement from Ascidian Prospecting Pty Ltd.
- Wodger Prospect - completed multiple phases of exploration with 10 RC holes (WDRC001-010) for 2,250m and two diamond holes (WRDD003-004) for 1,170m drilled. Bornite, chalcocite and native copper mineralisation intersected within a substantive quartz-carbonate breccia unit resulted in the following highlights:
  - WDRC002      14m @ 1.48% Cu from 118m, including:  
5m @ 3.61% Cu from 123m
  - WDRC003      61m @ 0.49% Cu from 122m, including:  
3m @ 1.07% Cu from 156m  
4m @ 1.31% Cu from 171m
  - WDRC005      50m @ 1.55% Cu from 175m, including:  
31m @ 2.39% Cu from 187m  
17m @ 3.41% Cu from 200m
  - WDRC006      78m @ 0.35% Cu from 75m, including:  
15m @ 1.17% Cu from 138m
  - WDRC007      6m @ 1.14% Cu from 235m

**DIRECTORS' REPORT (CONTINUED)**

- WDRC010      66m @ 0.59% Cu from 290m, including:  
                   3m @ 2.20% Cu from 307m  
                   11m @ 1.22% Cu from 317m  
                   5m @ 2.38% Cu from 346m
- WRDD003      71m @ 0.21% Cu from 365m, including:  
                   5.5m @ 0.49% Cu from 396m;  
                   2.5m @ 2.53% Cu from 419m;  
                   5.0m @ 0.50% Cu from 431m.
- WRDD004      6.8m @ 0.35% Cu from 272m  
                   72m @ 0.21% Cu from 344m, including:  
                   16m @ 0.44% Cu
- Forrest Prospect - one diamond hole (FGDD007) for 580 metres was drilled to further develop the Forrest prospect exploration model. This drill hole was designed to provide key structural and stratigraphic information and test the MLEM conductor.
- Multiple prospects across the Company's Bryah Basin tenements received both ground geophysics and aircore drilling to advance numerous early stage prospects:
- Orient South Prospect - 17 aircore holes for 1,071 metres with an anomalous Cu-Au-Ag intercept recorded within one hole, OSAC008: 5 metres @ 0.24% Cu, 1.07g/t Au & 0.78g/t Ag from 54 metres.
- Micks Well Prospect - rock chip analysis from 45 samples returned maximum gold values of 24.2g/t Au and 23.1g/t Au. Based on these results, a total of 36 aircore holes for 1,938 metres were completed, returning maximum gold values of 4 metres @ 0.15g/t Au from 36 metres from MLAC031, 4 metres @ 0.17g/t Au from 20 metres from MLAC008 and 4 metres @ 0.27g/t Au from MLAC010.
- Beatty Park Prospect – a coincident gravity low and EM anomaly was tested with aircore drilling returning anomalous results in BPAC002: 34 metres @ 1.52g/t Ag, 70ppb Pb from 92 metres to EOH.
- Horseshoe Well Project - early phase exploration (mapping, geochemical coverage, geophysical surveys) commenced on the project including a gravity survey (2,750 stations) over the entire project area.
- Feathercap Prospect - following the re-processing of the magnetic and ground gravity data that delineated a prospective structural trend to the historical mineralisation, 19 aircore holes for 1,709 metres (FPAC017 to FPAC039) were completed with best results of 11 metres @ 0.82g/t Au from 33 metres, including 1 metre @ 4.75g/t Au was returned from FCAC039.
- Morck's South Prospect - a single line of aircore holes (35 holes for 2,196 metres) was completed to test for copper-gold mineralisation.
- Citra V-Ti Prospect - 30 aircore holes for 560 metres defined anomalous V-Ti mineralisation for a strike of 460 metres and remains open along strike and at depth.

## **DIRECTORS' REPORT (CONTINUED)**

### **Planned 2018 Activities**

The ongoing review of the Company's projects has ranked the Forrest and Cashmans Projects as the highest priority for the first six months exploration activity. The work programme planned for these projects is two-pronged (geophysical and geochemical) to generate new targets and to advance existing prospects as follows:

- Regional VTEM survey to target massive sulphide mineralisation. The VTEM data will also be used to establish regolith thickness and help map out areas suitable for soil sampling (i.e., areas with thin residual soils).
- Regional and detailed geological interpretations using all available historical data (including data from previous drilling), to identify regional and/or local controls on mineralisation.
- Aircore drilling for geochemical sampling coverage by collecting a bottom-of-hole sample (on top of bedrock).

Prior to further drilling at Wodger, the following targeting work is planned:

- Induced Polarization (IP) orientation survey – the best geophysical method for targeting disseminated mineralisation and narrowing down targets;
- Processing of the regional VTEM data to identify potential massive sulphide mineralisation.

### **3. Events subsequent to reporting date**

The directors are not aware of any significant events since the end of the interim period, other than these announced subsequent to the end of the December 2017 Half Year:

- Released exploration update of Wodger and Forrest Prospects (See announcement on 24 January 2018).
- Released regional exploration update of Bryah Basin (See announcement on 30 January 2018).
- Expiry of unlisted options (See announcement on 1 February 2018).

**NOTES TO THE CONSOLIDATED FINANCIAL REPORTS**

**1. Basis of preparation**

Auris Minerals Limited (the Company or Auris Minerals) is a company domiciled and incorporated in Australia. The address of the Company’s registered office is Level 1, 18 Richardson Street, West Perth WA 6005. The interim consolidated financial report of the Company as at and for the six months ended 31 December 2017 comprises the Company and its wholly owned subsidiaries (together referred to as the “Group”).

The interim consolidated report has been prepared in accordance with AASB 134 Interim Financial Reporting and the Corporations Act 2001. The half-year financial report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the financial performance, financial position and financing and investing activities of the entity as the full financial report. It is recommended that the interim consolidated financial report be read in conjunction with the annual report for the year ended 30 June 2017 and considered together with any public announcements made by the Company during the six months ended 31 December 2017 in accordance with the continuous disclosure obligations of the ASX listing rules. The annual report of the Company as at and for the year ended 30 June 2017 is available on request from the Company’s registered office or at [www.aurisminerals.com.au](http://www.aurisminerals.com.au).

This interim consolidated financial report was approved by the Board of Directors on 16 March 2018.

**2. Accounting policies**

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period.

The Group has adopted all of the new, revised or amending Accounting Standards and Interpretations issued by the Australian Accounting Standards Board that are mandatory for the current reporting period. The adoption of these Accounting standards and Interpretations did not have any significant impact on the financial performance or position of the Group.

Any new, revised or amending Accounting Standards of Interpretations that are not yet mandatory have not been adopted early.

**3. Estimates**

The preparation of interim financial reports requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim financial report, the significant judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the annual financial report as at and for the year ended 30 June 2017.

**4. Operating segments**

The Group operates within one reportable segment, being the exploration and evaluation of mineral tenements in Western Australia. This internal reporting framework is the most relevant to assist the Board with making decisions regarding the Group and its ongoing exploration activities, while also taking into consideration the results of exploration work that has been performed to date.

**5. Exploration assets**

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors' determine is necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

#### *Auditor's Responsibility*

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the company's financial position as at 31 December 2017 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Auris Minerals Limited, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### *Independence*

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.

*Conclusion*

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of Auris Minerals Limited is not in accordance with the *Corporations Act 2001* including:

- (i) giving a true and fair view of the Auris Minerals Limited's financial position as at 31 December 2017 and of its performance for the half-year ended on that date; and
- (ii) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.
