

RNI INCREASES GROSVENOR GOLD ORE RESERVES TO 523,000oz

Resource and Investment NL (ASX: **RNI**) is pleased to announce an update of Mineral Ore Reserves at the Grosvenor Gold Project in Western Australia, further to the outcome of Feasibility Studies announced to the ASX on 6 November 2013.

With the stage one mine design now complete, Ore Reserves at Grosvenor have been upgraded to 8.79Mt @ a feed grade of 1.85g/t for **523Koz gold**, as presented to processing (Table 1).

Project	Classification	CIL Kt	CIL Feed Grade	HL Kt	HL Feed Grade	Total Ore Kt	Total Ore Feed Grade	Presented ounces (Koz Au)
Grosvenor	Proven	15	2.21	8	1.06	23	1.8	1.21
	Probable	6,386	2.23	2,385	0.82	8,771	1.85	521.69
	Total reserves	6,401	2.24	2,393	0.82	8,794	1.85	523.05

Table1: Summary – Grosvenor Ore Reserves November 2013

Detailed design work has been commissioned for the Daylight open pit and short, medium and long term mine planning activities have commenced to coincide with ongoing WA Mines Department statutory submissions. Ore Reserve reporting will occur once compliant JORC 2012 reserves have been declared.

Table 1 presents these Ore Reserves in summary. Ore reserves are NOT in addition to Mineral Resources. The current stage one mining plan at Grosvenor is represented in Appendix 1.

The Ore Reserves are from the Grosvenor project only. Ore Reserves for the Peak Hill gold project, which RNI has an option to acquire from Montezuma Mining Company Ltd, have yet to be declared.

The previous stage one mining plan announced by RNI in November 2012 had Probable Reserves of 275Koz, and total within-pit planned inventory, including Inferred Resources, of 299Koz, presented.

The current mine planning inventory has thus nearly doubled the Ore Reserve position.

The change between November 2012 and November 2013 is attributable to the studies and test work conducted to demonstrate the Heap Leach processing option as a viable method at both Grosvenor and Peak Hill.

Please refer to the following Appendices for the current mine plan, the explanation of modifying factors and the resource tables from which these reserves have been extracted.

Competent Person's Statement

The information in this ASX release that relates to Exploration Results and Mineral Resources is based on information compiled by Mr Albert Thamm, who is a Fellow and Chartered Professional of the Australasian Institute of Mining and Metallurgy. Mr Thamm is Director of Resource and Investment NL and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activities undertaken to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code of Reporting of Mineral Resources and Ore Reserves. Mr Thamm consents to the inclusion in the release dated 29 November 2013 on the matters based on information in the form and context in which it appears.

The information in this ASX release that relates to Mineral Reserves is based on information compiled by Mr Steven Craig, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Craig is Principal of Orelogy Pty Ltd and a consultant to Resource and Investment NL and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activities undertaken to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code of Reporting of Mineral Resources and Ore Reserves. Mr Craig consents to the inclusion in the release dated 29 November 2013 on the matters based on information in the form and context in which it appears.

Forward-Looking Statements

This announcement has been prepared by Resource and Investment NL. This document contains background information about Resource and Investment NL and its related entities current at the date of this presentation. This is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this announcement.

This announcement is for information purposes only. Neither this document nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares in any jurisdiction.

This announcement may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction. This document does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this representation are not intended to represent recommendations of particular investments to particular investments to particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. No responsibility for any errors or omissions from this document arising out of negligence or otherwise is accepted.

This document does include forward-looking statements. Forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions which are outside the control of Resource and Investment NL. Actual values, results, outcomes or events may be materially different to those expressed or implied in this announcement. Given these uncertainties, recipients are cautioned not to place reliance on forward-looking statements. Any forward-looking statements in this presentation speak only at the date of issue of this presentation. Subject to any continuing obligations under applicable law and ASX Listing Rules, Resource and Investment NL does not undertake any obligation to update or revise any information or any of the forward-looking statements in this document or any changes in events, conditions or circumstances on which any such forward-looking statement is based.

Note: Grade, tonnage and ounces have been rounded and may result in computational discrepancies the above tables.

Notes:

- CIL reserves are supported at Feasibility Level tolerance; Heap leach studies at Pre-feasibility level study.
- Grades are estimated as presented to processing and include mining dilution and mining recovery.
- Process gold recovery is estimated at 95% in CIL from past plant reconciliation and performance.
- Process gold recovery is estimated at 72% at Grosvenor in Heap Leach from bottle roll and column testwork.
- Pits are optimised at AUD1480, designed and scheduled LOM (life of mine).
- Studies were revenue factored for AUD 1450 gold price for years 1&2 and AUD 1400 thereafter
- The inferred material is within the design and reported for clarity. It is not included in the reserve statement.
