

RNI SECURES EXTENDED \$19.5M FUNDING PACKAGE TO PURSUE GOLD PRODUCTION PLANS

- Facility enables RNI to immediately acquire the Peak Hill Gold Project
- Peak Hill deal sees RNI expand its dominant position in the Bryah Basin
- Negotiations at advanced stage for final project financing for Grosvenor and Peak Hill

Resource and Investment NL (ASX: RNI) is pleased to announce that the Company has successfully negotiated an increase and extension of the Company's finance facility with Taurus Resources No.2 Fund (Taurus).

The original Taurus facility (see ASX announcements 20 December 2012 and 13 February 2013) has been increased from \$15 million to \$19.5 million. The date for repayment of the facility has been extended by approximately 12 months to 7 February 2015.

The facility has enabled RNI, through its wholly owned subsidiary, Grosvenor Gold Pty Ltd, (Grosvenor Gold) to exercise an option to acquire from Montezuma Mining Company Ltd (ASX: MZM) 100% of the issued capital of Peak Hill Metals Pty Ltd (See ASX announcements 27 September 2012 and 1 November 2013).

Peak Hill Metals owns the historic Peak Hill gold project (Figure 1), which adjoins RNI's Grosvenor gold project in Western Australia's highly-prospective Bryah Basin region. Peak Hill has JORC compliant gold resources of ~550,000 ounces which, when combined with RNI's Grosvenor project, gives the Company a combined gold inventory of ~2Moz (See Appendices 2-4).

As per the terms of the agreement, the consideration payable to Montezuma comprises \$2.8 million in cash, 8.4 million fully paid ordinary RNI shares and 2.1million unlisted RNI options exercisable at 35c per share within three years from the date of issue. In addition, Grosvenor Gold will pay Montezuma a 1% gross royalty, capped at \$1 million, on all revenue received from production at Peak Hill.

Figure 1: Grosvenor and Peak Hill project locations and regional geology

Payment of the \$2.8 million option exercise price, plus an additional payment of \$594,300 as a refund of the cash collateralised environmental bonds over Peak Hill, was made to Montezuma on 30 January 2014. By arrangement with Montezuma, completion of the share and option issues and ownership transfer documents is scheduled to be finalised on 31 January 2014.

As with the initial Taurus facility, the extended facility will be guaranteed by RNI and secured over the assets of RNI, Grosvenor Gold and Peak Hill. Further details relating to the terms of the new Taurus facility are set out in Appendix 1.

RNI Chairman Miles Kennedy said the \$19.5 million funding facility represented a strong show of faith by Taurus in RNI's plans to pursue a low-cost gold production pathway at the Grosvenor and adjoining Peak Hill gold projects. Mr Kennedy said the RNI Board was also in advanced negotiations with a number of parties regarding the final project financing package to enable the Grosvenor and Peak Hill gold projects to be developed.

"The extended Taurus facility will enable us to continue advancing our gold production feasibility studies at Grosvenor and Peak Hill, where we remain confident of achieving cash production costs of less than \$A1,000 per ounce," said Mr Kennedy.

"The historic Peak Hill gold project is an important part of our gold production plans and we are delighted to have secured this well-endowed gold province for what we believe is an extremely low cost per ounce."

"In addition, the Peak Hill deal has enabled RNI to entrench its position as the dominant tenement holder in Western Australia's Bryah Basin, the highly-prospective nature of which has been underlined by the recent moves by mining companies to secure exposure in this area."

Competent Person's Statement

Information in this announcement that relates to mineral resources is based on and fairly represents information and supporting documentation prepared and compiled by Albert Thamm BSc (Hons) MSc, who is a Corporate Member of the Australasian Institute of Mining and Metallurgy.

The information in this announcement that relates to previously released Project Resource data was disclosed in the ASX announcement dated 6 November 2013 under the JORC Code 2004. It has not been updated to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported and is based on and fairly represents information and supporting documentation prepared and compiled by Albert Thamm BSc (Hons) MSc, who is a Corporate Member of the Australasian Institute of Mining and Metallurgy.

Mr Thamm is a Director of Resource and Investment NL. Mr Thamm has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves. Mr Thamm consents to the inclusion in the announcement of the matters based on this information in the form and context in which it appears.

Forward-Looking Statements

This announcement has been prepared by Resource and Investment NL. This document contains background information about Resource and Investment NL and its related entities current at the date of this presentation. This is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this announcement.

This announcement is for information purposes only. Neither this document nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of shares in any jurisdiction.

This announcement may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction. This document does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this representation are not intended to represent recommendations of particular investments to particular investments to particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities transactions involve risks, which include (among others) the risk of adverse or unanticipated market, financial or political developments. No responsibility for any errors or omissions from this document arising out of negligence or otherwise is accepted.

This document does include forward-looking statements. Forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions which are outside the control of Resource and Investment NL. Actual values, results, outcomes or events may be materially different to those expressed or implied in this announcement. Given these uncertainties, recipients are cautioned not to place reliance on forward-looking statements. Any forward-looking statements in this presentation speak only at the date of issue of this presentation. Subject to any continuing obligations under applicable law and ASX Listing Rules, Resource and Investment NL does not undertake any obligation to update or revise any information or any of the forward-looking statements in this document or any changes in events, conditions or circumstances on which any such forward-looking statement is based.

Appendix 1: Details of the \$19.5 million Taurus Facility

The extended Taurus facility will carry interest at the rate of 12.5% a year for the first six months after the extension of the facility and 13.5% per annum for the remainder of the term of the facility.

The sum of \$2.8 million is required to be repaid to Taurus no later than 7 August 2014, with the balance of all amounts repayable under the extended facility being payable no later than 7 February 2015.

Under the amended terms of the initial facility, which continue to apply to the extended facility, on final repayment of the extended facility Taurus may elect to convert a portion of the drawn-down facility into fully paid ordinary RNI shares at no more than 20c per share. Alternatively, Taurus can elect to receive a termination fee, by way of a deferred rollover establishment fee, based on an agreed formula and 19.5 million RNI options. Each of these RNI options will be exercisable within three years of the date of issue at an exercise price equal to the volume weighted average price of all RNI shares traded on ASX calculated over the five trading days (as defined in the Listing Rules) immediately preceding the extension of the facility.
